

MARK[®] CZ 11 G

Description	Calcium/zinc stabiliser
Delivery form	White powder
Application	<p>MARK[®] CZ 11 G is a non-toxic metal soap stabiliser for plasticised PVC applications.</p> <p>This stabiliser is typically used in combination with synergistic additives. For long-term heat stability improvement epoxidised esters like DRAPEX[®] 39 or DRAPEX[®] 392 are recommended. Initial colour can be improved by adding phosphites like MARK[®] CH 55.</p> <p>MARK[®] CZ 11 G has a distinct inherent lubricating action, which has to be taken into account when optimising the formulation by lubricants.</p>
Approval	The approval status depends on the local requirements. Specific information can be submitted on request.
Dosage	Recommended dosage level: 1.5 – 2.5 phr
Specification	The specified values are given in the Product Specification.
Packaging	MARK [®] CZ 11 G is supplied in paper bags with interior PE lining (contents 20 kg).
Storage	<p>Please refer to the MSDS.</p> <p>Recommended storage temperature: 15 - 30 °C</p> <p>Keep packaging dry and reseal tightly after use.</p>
